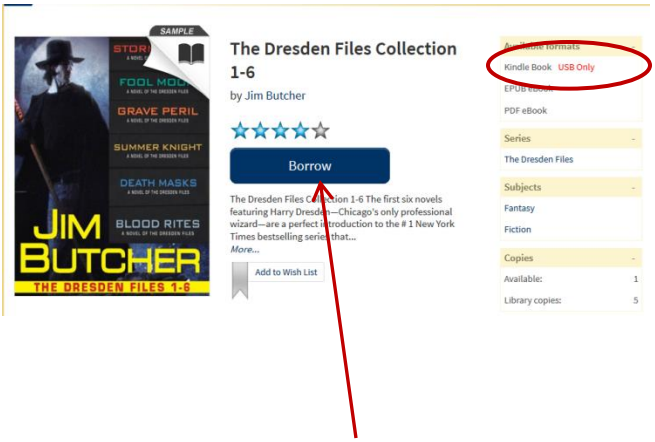
Kindle Borrowing via USB

WILBOR Guides

Updated 3/21/2013

It is possible to load WILBOR ebooks onto a Kindle device (Kindle, Kindle Touch, Kindle Keyboard, Kindle DX) when Wi-Fi is not available. This method also works for titles that the publisher does not allow to be delivered wirelessly.



1. Log in to your Amazon account.

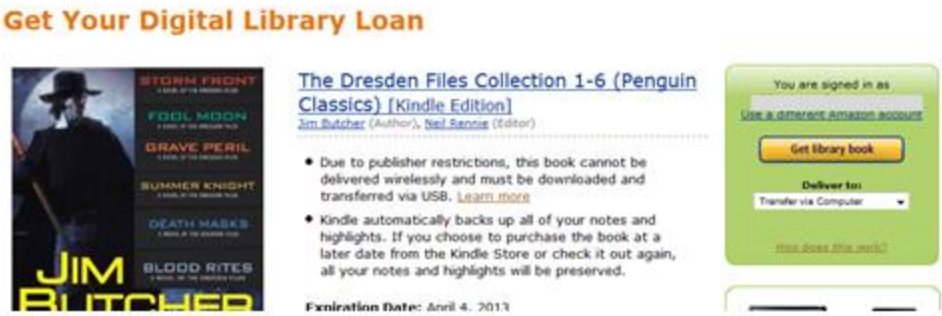
2. On the WILBOR website, showing the book you wish to borrow, Click on "Borrow."

3.

4. On your Bookshelf, pull down the menu to "Select one format," and click on the box next to "Kindle Book."

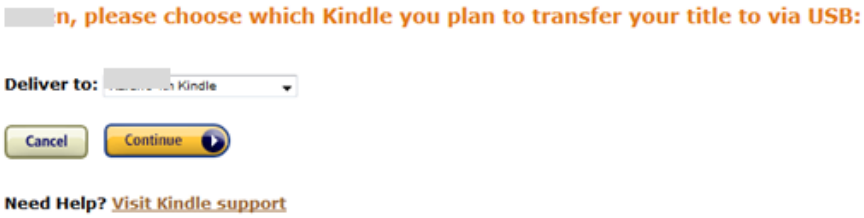
5. Click on "Confirm and Download."

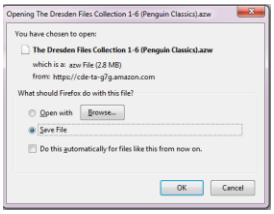
6. The transaction will be "handed off" to Amazon. (Be aware that Amazon's privacy policy is different than that of your library. Please read Amazon's privacy policy before you download a book.)



8. Under “Deliver to,” it will show “Transfer via Computer” as your only delivery method. Click on “Get library book.”

9. Click on “Continue.”

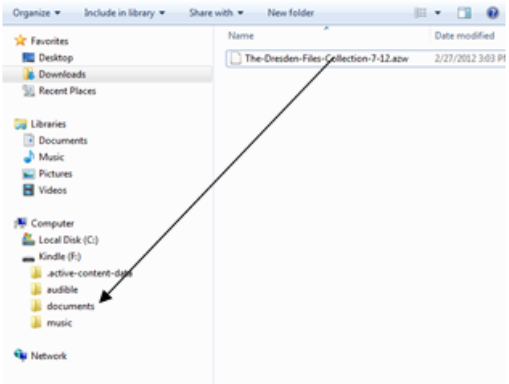


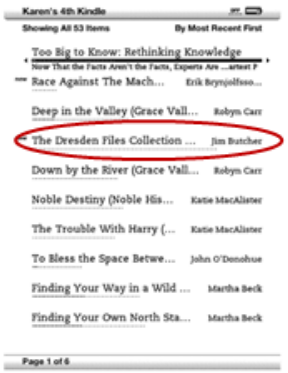


10. Click on OK. This will save your Kindle Edition to the default downloads folder of your computer.

11. Connect your Kindle to your computer via USB. Your computer may need to install some drivers if you haven’t done this before.

12. Copy, or click-and-drag the file from your download location to the documents directory on your Kindle.





13. Eject your Kindle from your computer and disconnect the USB cable. Your book will now appear on your home screen. If it does not show up right away, choose “Sync & Check for Items” from the Kindle’s Menu.
